#CPTS\_322\_PROJECT

Software Engineering Principles I Course Project

Project Name: GPTask

Instructor: Dr. Haipeng Cai

Contributors: Ethan Villalovoz, Roy Zabetski, Bryan Frederickson, Nicholas Santos, Ryan Aloof

Summary: The objective is to develop a software product for individuals looking to organize their tasks. Our group gained inspiration to develop a task management app that incorporates ChatGPT and other key features to simplify tasks for the user.

#### **The core features of the app are:**

- Utilization of openai's chatgpt to help break down user tasks into smaller sub-tasks.
- Time tracking on individual tasks
- Speech to text
- Calendar for visual planning.
- Due Dates
