Ideas List:

Recommendation Letter Management (client Andy)

    - students can request a letter of recommendation from their teacher through a website

    - teachers use website know what type of letter they are writing and for whom

Teacher Voting (client… school?)

    - similar to end of semester/year class reviews students are free to rate their classes and teachers

    - adds the ability for new students to view other student reviews for said class and teacher before enrollment

TA scheduling system (plug in your own sched for easy sched)

    - simple as plugging in your own wsu schedule to view TA hours that are compatible with your schedule

    - addition: highlight hours that would be most compatible with your schedule(ex: if you have two classes an hour apart, it highlights this time, or hours before or after classes)
